# Market Discipline-Pillar-III Disclosures under Basel-II

## As on 31 December 2011

#### Capital Adequacy under Basel-II

Banks operating in Bangladesh are maintaining capital since 1996 on the basis of risk weighted assets in line with the Basel Committee on Banking Supervision (BCBS) capital framework published in 1988. Considering present complexity and diversity in the banking industry and to make the banks' capital requirement more risk sensitive, Bangladesh Bank, being the central bank of the country has decided to adopt the Risk Based Capital Adequacy for banks in line with capital adequacy framework devised by the BCBS popularly known as 'Basel II'. Bangladesh Bank prepared a guideline to be followed by all scheduled banks from January 2009. Both the existing capital requirement rules on the basis of Risk Weighted Assets and revised Risk Based Capital Adequacy Framework for Banks as per Basel II were followed simultaneously initially for one year. For the purpose of statutory compliance during the period of parallel run i.e. 2009, the computation of capital adequacy requirement under existing rules prevailed. On the other hand, revised Risk Based Capital Adequacy Framework as per Basel II had been practiced by the banks during 2009 so that Basel II recommendation could effectively be adopted from 2010. From January 2010, Risk Based Capital Adequacy Framework as per Basel II have been fully practiced by the banks replacing the previous rules under Basel-I. Pubali Bank Limited is maintaining its capital requirements at adequate level by adopting the Risk Based Capital Adequacy Guidelines of Bangladesh Bank in line with Basel II model.

The guideline is structured around the following three aspects or pillars of Basel-II:

- i. Minimum capital requirements to be maintained by a bank against credit, market and operational risk;
- ii. Supervisory Review i.e., Process for assessing overall capital adequacy in relation to a bank's risk profile and a strategy for maintaining its capital at an adequate level;
- iii. Market Discipline i.e., To make public disclosure of information on the bank's risk profiles, capital adequacy and risk management.

#### **Disclosure framework of Pubali Bank Limited**

Disclosure includes the following as per Bangladesh Bank guidelines:

- Scope of Application
- Assets under Banking Book and Trading Book
- Credit risk

### **Qualitative Disclosure**

(a)	The general
	qualitative
	disclosure
	requirement
	with respect to
	credit risk,
	including:

Bank classifies loans and advances (loans and bill discount in the nature of an advance ) into performing and non-performing loans (NPL) in accordance with the Bangladesh Bank guidelines in this respect.

An NPA is defined as a loan or an advance where interest and / or installment of principal remain overdue for more than 90 days inrespect of a Continuous credit, Demand loan or a Term Loan etc.

Classified loan is categorized under following 03 (three) categories:

- > Sub- Standard
- Doubtful
- ➤ Bad & Loss

#### Any **continuous loan** will be classified as:

- > Sub-standard' if it is past due/over due for 6 months or beyond but less than 9 months.
- > "Doubtful" if it is past due/over due for 9 months or beyond but less than 12 months
- > 'Bad/Loss' if it is past due/over due for 12 months or beyond.

## \* Definitions of past due and impaired (for accounting purposes)

Any **demand Loan** will be classified as:

- > Sub-standard' if it remains past due/over due for 6 months or beyond but not over 9 months from the date of claim by the bank or from the date of creation of forced loan.
- > Doubtful' if it remains past due/over due for 9 months or beyond but not over 12 months from the date of claim by the bank or from the date of creation of forced loan.
- > Bad/Loss' if it remains past due/over due for 12 months or beyond from the date of claim by the bank or from the date of creation of forced loan.

In case of any installment(s) or part of installment(s) of a Fixed Term Loan is not repaid within the due date, the amount of unpaid installment(s) will be termed as 'defaulted installment'.

- i. In case of Fixed Term Loans, which are repayable within maximum five years of time:
- > If the amount of defaulted installment' is equal to or more than the amount of installment(s) due within 6 (six) months, the entire loan will be classified as "Sub-standard".
- > If the amount of defaulted installment' is equal to or more than the amount of installment(s) due within 12 (twelve) months, the entire loan will be classified as "Doubtful".
- > If the amount of defaulted installment' is equal to or more than the amount of installment(s) due within 18 (eighteen) months, the entire loan will be classified as "Bad/Loss".
- ii. In case of Fixed Term Loans, which are repayable in more than five years of time:
- > If the amount of defaulted installment' is equal to or more than the amount of installment(s) due within 12 (twelve) months, the entire loan will be classified as "Sub-standard".
- > If the amount of defaulted installment' is equal to or more than the amount of installment(s) due within 18 (eighteen) months, the entire loan will be classified as "Doubtful".
- > If the amount of defaulted installment' is equal to or more than the amount of installment(s) due within 24 (twenty four) months, the entire loan will be classified as "Bad/Loss".

 Discussion of the Bank's credit risk management policy

The Board approaves the credit policy keeping in view relevant Bangladesh Bank guide lines to ensure best practice in credit risk management and maintain quality of assets. Authorities are properly delegated in ensuring check and balance in credit operation at every stage i.e. screening, assessing risk, identification, management and mitigation of credit risk as well as monitoring, supervision and recovery of loans with provision for early warning system. There is a separate Credit Risk Management Division for ensuring proper risk

management of Loans and Credit Monitoring and Recovery Division for monitoring and recovery of irregular loans. Adequate provision is maintained against classified loans as per Bangladesh Bank Guidelines. Status of loans are regularly reported to the Board/Board Audit Committee. Besides, Credit risk management process involves focused on monitoring of Top- 30 Loans, Top-20 Defaulters, Sectoral exposures viz-a-viz among others limit.

(e) Capital requirements broken down by appropriate equity grouping, consistent with the bank's methodology, as well as the aggregate amounts and the type of equity investments subject to any supervisory provisions regarding regulatory capital requirements	Nil

### F) Interest rate risk in the banking book (IRRBB)

#### **Qualitative Disclosure**

(a) The general qualitative disclosure requirement including the nature of IRRBB and key assumptions, including assumptions regarding loan prepayments and behavior of nonmaturity deposits, and frequency of IRRBB measurement.

Interest rate risk is the potential that the value of the On Balance Sheet and the Off Balance Sheet position of the Bank would be negatively effected with the change in the Interest rate. The vulnerability of an institution towards the advance movement of the interest rate can be gauged by using Duration GAP under Stress Testing Analysis. Pubali Bank Limited has also been exercising the Strees Testing using the Duration GAP for measuring the Interest Rate Risk on its On Balance Sheet exposure for estimating the impact of the net change in the market value of equity on the Capital Adequacy Ratio (CAR) due to change in interest rates only on its On Balance Sheet position (as the Bank holds no interest bearing Off Balance Sheet positions and or Derivatives). Under the assumption of three different interest rate changes i.e. 1%, 2% and 3%.

# G) Market Risk Qualitative Disclosure

(a) Views of BOD on trading / investment activities	The Board approves all policies related to market risk, sets limits and reviews compliance on a regular basis. The objective is to provide cost effective funding last year to finance asset growth and trade related transaction.
(b) Methods used to measure Market risk	Standardized approach has been used to measure the market risk. The total capital requirement in respect of market risk is the aggregate capital requirement calculated for each of the risk sub-categories. For each risk category minimum capital requirement is measured in terms of two separately calculated capital charges for 'specific risk' and 'general market risk'.
(c) Market risk Management system	The Treasury Division manage market risk covering liquidity, Interest rate and foreign exchange risks with oversight from Asset-Liability management Committee (ALCO) comprising senior executives of the Bank. ALCO is chaired by the Managing Director. Alco meets at least once in a month.
(d) Policies and process for mitigating market risk	There are approved limits for Market risk related instruments both on-balance sheet and off-balance sheet items. The limits are monitored and enforced on a regular basis to protect against market risks. The exchange rate committee of the Bank meets on a daily basis to review the prevailing market condition, exchange rate, forex position and transactions to mitigate foreign exchange risks.
